01 Introduction

Manhar Creatives is a premium digital solutions and branding studio built around a single, clear purpose — helping modern businesses establish strong, professional, and growth-oriented digital presence.

We are not a generic design service. We are a structured creative partner that brings together strategic thinking, market understanding, purposeful design, and scalable digital execution. Every solution we build is rooted in clarity, credibility, and long-term business impact.

Our Philosophy

Our philosophy is simple and consistent:

"We Design, We Build, You Grow." — Every project we take on is guided by this commitment. We design with strategy, build with structure, and focus on outcomes that genuinely help businesses grow.

We believe that great digital work is never just visual — it is purposeful, scalable, and aligned with real business goals.

Our Commitment

This document — our Service Policies & Workflow Standards — has been created to establish a clear, professional framework for how we engage, collaborate, and deliver.

It reflects our commitment to:

- Structured and transparent project workflows
- Professional communication and mutual respect
- Clearly defined expectations for both parties
- Delivering high-quality outcomes on every engagement
- Building long-term, trust-based partnerships

This document applies to all clients, projects, and service engagements with Manhar Creatives. We encourage every client to read through it before beginning a project — and to reach out with any questions before work commences.

02 Project Workflow Overview

Every project at Manhar Creatives follows a clear, structured process designed to ensure strategic alignment, consistent execution, and high-quality delivery. Below is an overview of our standard project journey.

Phase 1 — Inquiry & Initial Discussion

The engagement begins with an open and relaxed conversation. We listen to understand your business, your goals, your current digital presence, and what you are hoping to achieve. This is a collaborative discovery phase — not a sales pitch.

Phase 2 — Understanding Requirements

Once we have an initial understanding, we move into a structured requirements gathering phase. We explore your target audience, market positioning, visual preferences, content assets, and specific project needs. This phase helps us shape a tailored proposal and execution plan.

Phase 3 — Planning & Research

Before any design or development work begins, we invest time in market research, competitor analysis, and strategic planning. This ensures our execution is grounded in market context and aligned with your growth objectives.

Phase 4 — Design & Execution

With a clear plan in place, our team moves into the design and execution phase. We build clean, professional, and strategically structured solutions — whether that is a website, a brand identity system, or a suite of marketing materials. Every output is crafted with purpose.

Phase 5 — Review & Refinement

We present work for your review at defined checkpoints. Client feedback is carefully reviewed, and revisions are incorporated within the agreed scope. This is a collaborative refinement phase — we work with you to ensure the output is exactly right.

Phase 6 — Final Delivery

Once the project is finalized and approved, all deliverables are organized and transferred in the agreed formats. We provide clear handover documentation and, where applicable, guidance on how to use and maintain your new digital assets.

Phase 7 — Future Support & Collaboration

Our relationship does not end at delivery. We offer post-project support, maintenance services, and ongoing collaboration for clients who wish to continue building and growing their digital presence over time.

03 Project Categories & Workflow Structure

We recognize that not all projects carry the same complexity or scale. To ensure our processes remain practical, efficient, and proportionate, we operate across three structured project tiers.

Small Projects — Lightweight Workflow

Small projects are typically quick-turnaround deliverables with clearly defined scope. These are executed through a simplified workflow that prioritizes speed and clarity without unnecessary process overhead.

Examples of Small Projects:

- Posters and promotional creatives
- Social media content and campaign graphics
- Visiting cards and business stationery
- Quick print design work

Workflow approach: Brief discussion → Execution → Review → Delivery. A streamlined process for focused, short-scope work.

Medium Projects — Semi-Structured Workflow

Medium projects involve more complexity and require a structured approach to ensure strategic alignment, quality execution, and effective client collaboration.

Examples of Medium Projects:

- Brand identity systems and logo design packages
- Brochures and multi-page print materials
- Restaurant digital systems and QR menu setups
- Landing pages and single-service websites

Workflow approach: Discovery → Planning → Design → Review Cycle → Delivery. Structured with defined checkpoints and revision stages.

Large Projects — Fully Structured Workflow

Large projects are high-value, multi-phase engagements that require comprehensive planning, dedicated execution, and milestone-based management. These projects are handled with complete project management protocols.

Examples of Large Projects:

- Full business websites and corporate web systems
- Complete branding systems with full asset suites
- Multi-platform digital presence setups
- Long-term retainer and collaborative partnerships

Workflow approach: Full discovery and research → Proposal & agreement → Phased execution → Milestone reviews → Final delivery → Support planning. Detailed documentation and structured milestones at every stage.

04 Payment Policy

Our payment structure is designed to be fair, transparent, and aligned with the scale and nature of each project. All payment terms are agreed upon before project commencement.

Payment Structure by Project Tier

Small Projects

Small projects — including posters, visiting cards, social media creatives, and similar short-scope deliverables — typically require full advance payment before work begins. This structure ensures we can allocate dedicated time and resources to your project immediately.

Medium Projects

Medium projects typically follow a 50% advance and 50% upon completion structure. The advance payment confirms the project brief and initiates the workflow. The balance is settled upon final approval, prior to file delivery.

Large Projects

Large projects — including full website builds, comprehensive branding systems, and long-term engagements — follow a milestone-based payment structure. Specific milestones and corresponding payment amounts are defined in the project agreement and agreed upon by both parties before work begins.

Printing & Production Projects

For projects involving physical printing and production, pricing may vary depending on the following factors:

- Printing vendor and supplier availability
- Material type and paper stock selection
- Quantity and order size
- Finishing requirements — lamination, foiling, embossing, etc.
- Delivery logistics and timelines

Printing quotations are estimates based on current vendor pricing and are subject to change. Final production costs are confirmed before any print order is placed.

File Delivery & Pending Balances

Final project files, source files, and digital assets are transferred to the client once all outstanding balances for the project have been settled. This policy applies uniformly across all project types and is a standard professional practice.

Payment Methods

Accepted payment methods and specific payment details are communicated during the project discussion phase. All transactions are conducted securely and transparently.

05 Revision Policy

We are committed to delivering work that meets your expectations and aligns with the original project brief. Our revision process is designed to be collaborative, structured, and respectful of both quality and timelines.

What Revisions Are Included

Each project includes a defined number of revision rounds, as outlined in the project brief or proposal. Included revisions cover:

- Adjustments to layout, color, and typography within the original design direction
- Text and content modifications based on provided feedback
- Refinements aligned with the initial brief and agreed visual direction

Revisions Beyond Scope

The following types of changes fall outside the standard revision scope and may require a revised timeline or additional charges:

- Complete redesigns or changes in design direction after concepts have been approved
- Scope expansions — adding new pages, sections, or deliverables not in the original brief
- Content restructuring that requires significant rethinking of layout or flow
- Requests made after final delivery that differ substantially from the approved direction

In such situations, we will always communicate the implications clearly and transparently before proceeding — ensuring there are no surprises on either side.

Revision Request Process

All revision requests should be submitted in a clear and consolidated manner — ideally in a single message or document — after reviewing the delivered work. Consolidated feedback helps us process revisions efficiently and avoids back-and-forth that can delay timelines.

06 Communication Policy

Clear and professional communication is at the core of every successful project. We maintain structured communication standards to ensure projects stay on track and both parties remain aligned at every stage.

Preferred Communication Channels

All project-related communication is conducted through agreed channels, which may include:

- WhatsApp — for day-to-day updates, quick queries, and brief check-ins
- Email — for formal communications, project briefs, approvals, and documentation

- Scheduled calls or meetings — for project kick-offs, reviews, and strategic discussions

Clients are requested to keep all project-related communication within the agreed channel for clarity and traceability.

Response Timelines

Our Response Time	We aim to respond to all messages within 1 business day during active project phases. Response times may vary during weekends, public holidays, or non-working hours.
Client Response Time	Timely feedback and approvals from the client are essential to keeping projects on schedule. Delays in client responses may result in corresponding shifts in project timelines.
Project Updates	We provide regular project updates at defined milestones, ensuring you are always informed of progress without needing to follow up.

Professional Communication Standards

We believe all professional relationships thrive on mutual respect and clarity. All communication — from both sides — is expected to remain professional, constructive, and focused on project goals. We are committed to always maintaining this standard from our end.

07 Content & Material Submission Policy

Many projects require clients to supply content, brand assets, and other materials as part of the workflow. The timely and organized submission of these materials is essential to maintaining project timelines and quality standards.

Client Responsibilities — Materials & Content

Clients are responsible for providing the following materials when required:

- Business information, service descriptions, and company content
- High-resolution logos and existing brand assets
- Product or service photography and imagery
- Written content, taglines, or copy for websites and marketing materials
- Any reference designs, examples, or inspiration for direction
- Approvals at defined project checkpoints

Timelines & Submission Delays

Project timelines are calculated based on the assumption that required materials will be submitted in a timely manner. Delays in content or material submission may result in corresponding shifts in the project delivery timeline.

We will always communicate any timeline adjustments in advance and work collaboratively to keep the project moving forward as efficiently as possible.

Content Accuracy & Approvals

Clients are responsible for reviewing and approving all content submitted for use in the project. Manhar Creatives does not independently verify factual accuracy of client-provided information, including business details, pricing, contact information, and legal content. Clients are encouraged to thoroughly review all materials before submission.

08 Printing & Production Policy

When projects involve physical printing and production — such as visiting cards, brochures, menus, posters, or banners — specific policies apply to ensure clarity, quality control, and cost transparency.

Printing Quotations & Pricing

All printing quotations are provided as estimates based on current vendor pricing, material availability, and quantity requirements. Final pricing is confirmed before any production order is placed.

Factors that influence printing costs include:

- Type of material and paper stock selected
- Print quantity and order volume
- Finishing options — matte/gloss lamination, foiling, spot UV, embossing
- Print dimensions and bleed requirements
- Delivery timeline requirements

Vendor Dependency

Manhar Creatives works with external printing vendors and suppliers. While we partner with reliable vendors, we cannot guarantee pricing stability in cases of market fluctuations or supply constraints. Any changes to quoted pricing will be communicated before the order is confirmed.

Client Approval Before Production

No print or production order is placed without explicit client approval on the final design and confirmed quotation. Once production has commenced, changes or cancellations may not be feasible, and any associated costs will be the responsibility of the client.

Design for Print Standards

All print-ready designs delivered by Manhar Creatives adhere to professional print standards — including correct resolution, color profiles (CMYK where required), bleed and safe zone guidelines, and file format specifications.

09 Project Timeline Policy

Project timelines are established collaboratively, based on project scope, complexity, and the availability of required materials. We are committed to meeting agreed timelines through structured execution and consistent communication.

Timeline Estimation

Timelines are provided as part of the project proposal or initial discussion. Estimates are based on:

- Scope and complexity of the project
- Revision rounds included in the plan
- Client availability for feedback and approvals
- Availability of content, brand assets, and required materials

Factors That May Affect Timelines

The following situations may result in timeline adjustments:

- Delays in client feedback, approvals, or content submissions

- Scope changes or direction shifts after project commencement
- Third-party dependencies — hosting providers, domain registrars, external platforms
- Technical issues outside the control of Manhar Creatives

In any situation that may affect the delivery timeline, we will communicate proactively and work to minimize the impact on project completion.

Expedited Timelines

For urgent projects requiring faster delivery than standard timelines, expedited delivery may be available. Rush timelines may carry additional charges depending on the scope and urgency of the project. This will always be communicated and agreed upon before proceeding.

10 Delivery Policy

Final delivery is a structured and carefully managed process at Manhar Creatives. We ensure that all deliverables are organized, clearly labeled, and transferred in the correct formats for your intended use.

File Organization & Delivery

All final files are organized into clearly structured folders and delivered with proper labeling. Clients receive:

- Final production-ready files in agreed formats
- Web-optimized versions where applicable
- Print-ready files where applicable
- Source files as agreed upon in the project scope

Supported File Formats

Deliverables may include the following formats depending on the project type:

Branding & Print	PDF, PNG, JPG, SVG, AI (Adobe Illustrator), PSD (Photoshop)
Website Projects	Live URL, CMS access, codebase files (as agreed)
Social Media Assets	PNG, JPG, optimized web formats
Digital Menus / QR	Live system access, PDF backup version

Transfer Process

Files are delivered via secure digital transfer — through cloud storage (Google Drive or similar platforms), email, or other agreed methods. A delivery summary is provided along with the final files to ensure the client has a clear understanding of all received assets.

Post-Delivery Responsibility

Once final files have been delivered and the handover is complete, the client assumes responsibility for the management, storage, and use of all delivered assets. We strongly recommend that clients maintain secure backups of all received files.

11 Refund & Cancellation Policy

We approach refunds and cancellations with professionalism and fairness. Our policy is designed to protect both the client and the agency while acknowledging the custom, strategic nature of our work.

Non-Refundable Work

Due to the customized and strategic nature of our services, payments made toward completed project phases are non-refundable. This applies in situations where:

- A project phase — research, planning, design, or development — has been completed and delivered
- Revisions and refinements have been incorporated based on client feedback
- Time and resources have been allocated and expended as agreed

Project Cancellation

Should a client wish to discontinue a project after commencement, the following applies:

- Work completed up to the point of cancellation is billable and non-refundable
- Any unused advance for work not yet commenced may be discussed and handled on a case-by-case basis
- Cancellation must be communicated formally — in writing via email or agreed channel

Exceptional Circumstances

We understand that unforeseen circumstances can arise. In exceptional situations — where a project cannot proceed due to significant issues on our end — we will work collaboratively and in good faith to find a fair resolution. Our commitment to long-term relationships means we always approach such situations with integrity.

12 Support & Maintenance Policy

Long-term support and maintenance are a natural extension of the partnership we build with every client. We offer structured support options to ensure your digital assets remain current, functional, and performing optimally over time.

Post-Delivery Support

All projects include a defined post-delivery support window during which minor questions, clarifications, and small adjustments are handled at no additional cost. The duration of this window varies by project type and is confirmed in the project agreement.

Website Maintenance Services

For website projects, we offer ongoing maintenance services covering:

- Content updates and text modifications
- Image and media replacements
- Performance monitoring and basic optimizations
- Plugin and platform updates where applicable
- Bug fixes and technical issue resolution
- Hosting and domain assistance

Branding & Design Support

For clients with active branding partnerships, we offer ongoing design support covering:

- New marketing creatives and promotional materials
- Seasonal and campaign design updates
- Social media content creation and refreshes
- Brand asset extensions and additions

Maintenance Plans

Dedicated maintenance and retainer plans are available for clients who require consistent, ongoing support. These plans are structured on a monthly basis and are tailored to the specific needs and scale of the business. Details and pricing are discussed and agreed upon separately from the primary project.

13 Ownership & Usage Rights

Clarity around ownership and usage rights is essential for a professional and trustworthy business relationship. Our policy is transparent, fair, and designed to protect both parties.

Client Ownership Upon Full Payment

Upon receipt of full and final payment for the project, full ownership of all delivered design work, website files, and digital assets is transferred to the client. Clients are free to use, adapt, and build upon delivered assets for their business purposes.

Pre-Payment Usage

Prior to final payment, all deliverables — including concepts, drafts, and designs — remain the intellectual property of Manhar Creatives. Clients are not authorized to deploy, publish, or commercially use any work until full payment has been received and the project is formally closed.

Third-Party Assets

Some projects may incorporate third-party elements — including stock photography, icon libraries, typefaces, or plugins — that are governed by their own licensing terms. Where applicable, we will advise clients on any licensing requirements or restrictions associated with third-party assets used in their project.

Portfolio & Showcase Rights

Manhar Creatives reserves the right to feature completed work in our portfolio, case studies, website, and marketing materials for the purpose of showcasing our capabilities. If a client prefers their project not to be featured publicly, this preference should be communicated before project completion, and we will honor it.

14 Closing Statement

At Manhar Creatives, every policy and workflow standard in this document exists for one reason — to build better, more trustworthy, and more impactful partnerships.

We believe that great work is the product of great collaboration. When both parties understand the process, communicate clearly, and work toward shared goals, the results are consistently stronger — and the experience is genuinely rewarding for everyone involved.

This document is not a wall of restrictions. It is a foundation of clarity — a shared understanding that allows us to focus our energy on what truly matters: building digital systems, brand identities, and digital presences that help your business grow with confidence.

If you have any questions about anything in this document — or if there is anything you would like to discuss before beginning a project — we welcome that conversation. Reach out to us directly, and we will be happy to walk through any aspect of this document with you.

We look forward to building something meaningful together.

Manhar Creatives

We Design, We Build, You Grow.
